1 Trusted paths for browsers
Zishuang (Eileen) Ye, Sean Smith, Denise Anthony
May 2005 **ACM Transactions on Information and System Security (TISSEC),** Volume 8 Issue 2
Publisher: ACM Press

Full text available: 📄 pdf(265.37 KB)   Additional Information: full citation, abstract, references, citings, index terms

Computer security protocols usually terminate in a computer; however, the human-based services which they support usually terminate in a human. The gap between the human and the computer creates potential for security problems. We examine this gap, as it is manifested in secure Web servers. Felten et al. demonstrated the potential, in 1996, for malicious servers to impersonate honest servers. In this paper, we show how malicious servers can still do this---and can also forge the existence of an ...

3 Classroom BRIDGE: using collaborative public and desktop timelines to support activity awareness
Craig H. Ganoe, Jacob P. Somervell, Dennis C. Neale, Philip L. Isenhour, John M. Carroll, Mary Beth Rosson, D. Scott McCrickard
November 2003 **Proceedings of the 16th annual ACM symposium on User interface software and technology UIST '03**

Publisher: ACM Press

Full text available: pdf(920.15 KB)   Additional Information: full citation, abstract, references, citings, index terms

Classroom BRIDGE supports activity awareness by facilitating planning and goal revision in collaborative, project-based middle school science. It integrates large-screen and desktop views of project times to support incidental creation of awareness information through routine document transactions, integrated presentation of awareness information as part of workspace views, and public access to subgroup activity. It demonstrates and develops an object replication approach to integrating synchron ...
